

SITHOLE NKOKA NATASHIA

Aspiring Software Engineer

+27 65 592 8691 | sitholenkoka@gmail.com | [LinkedIn](#) | [Github](#) | Johannesburg

Final-year Computer Science student at the University of Johannesburg with hands-on experience building web and mobile applications. Skilled in collaborative, agile software development, from database design to responsive frontend interfaces. Eager to apply strong problem-solving and teamwork skills as a software engineer.

EDUCATION

BSc in IT in Computer Science and Informatics

2024 – 2026(Expected)

University of Johannesburg

AREAS OF EXPERIENCE

Programming Languages: C++, Java, C#, Python, SQL, Visual Basic (.NET)

Frontend & Frameworks: HTML, CSS, JavaScript, React, ReactJS

Databases & Tools: MySQL, Git, VS Code

Other Skills: Communication, teamwork, leadership

PROJECTS

Career Fair–Job Portal Bridging Platform (Web & Mobile Application) – Group Project

Feb 2026 – Present

Technologies: React, React Native, Python with FastAPI, SQLite, Git/Github

- Developing a platform connecting students, recruiters and employers through digital career fairs
- Implemented recruiter workflows, company invitations, job postings and application tracking
- Built responsive React interfaces integrated with backend APIs and SQL databases
- Applied software engineering practices including UML, Git, testing and SDLC
- Building a web and mobile application with core features including job posting, application submission, and application tracking

Graph-Based EMS Route Optimisation System (Java, JavaFX) – Group Project

March 2026 – May 2026

Technologies: Java, JavaFX, Eclipse IDE, Git/Github

- Implemented Dijkstra's algorithm for shortest-path optimization
- Applied k-NN to analyse traffic similarities
- Built custom graph data structures and JavaFX interface

E-commerce Website – Group Project

July 2025 – September 2025

Technologies: HTML, CSS, JS, C#, SQL

- Collaborated in a team to design and develop a fully functional e-commerce website
- Implemented core features such as product listings, user registration, and shopping cart functionality
- Developed and integrated backend logic with database support for managing products and users
- Contributed to frontend development to ensure a user-friendly interface
- Worked collaboratively using version control and team coordination practices

PROFESSIONAL EXPERIENCE

Student Assistant (Computer Science 1A)

Feb 2026 – Present

Johannesburg

- Assisted first-year students in C++ programming, improving their understanding of core concepts
- Assisted in debugging code and resolving programming errors during lab sessions
- Simplified complex programming concepts to enhance student comprehension and performance

CERTIFICATIONS

- AI Agents for Beginners – Short Course
- Motus Hackathon – Certificate of Participation
